Fish Pick-up Saturday, April 22, 2017

7:30 a.m. - 8:30 am.

AT THE

Kane-DuPage SWCD Office

Located 2315 Dean St., Suite 100 in St. Charles (west of Randall Road)

ORDER DEADLINE:

Triploid Carp - April 3, 2017. Other fish orders - April 14, 2017.

REFUND POLICY: In the event you are unable to pick up your order, please call to notify the District office by Friday, April 21, 2017, for a full refund. Orders not picked up on April 22, 2017 will not be refunded.

About Triploid Grass Carp

This fish is used for biological weed control and takes approximately two years to provide good control. Stocking rates are based on percentage of weed cover and size of pond. If your pond has weed cover of 20-40%, 5 Triploid Carp per lake acres should be stocked; 40-60% weed cover, 10 Triploid Carp per lake acres are recommended. Ponds must have an area that is 7-10' deep for the fish to overwinter. The Grass Carp is sterile and will not reproduce. **Pond location information (County, Township, Section) must be filled out on the order form** as the District must apply for a permit from IDNR.

When picking up fish: We ask everyone to bring some type of container to ensure better fish survival during transport. The fish, except for catfish, will be put into oxygen filled bags with water. Bring a 5 gallon bucket for smaller fish. The bags easily fit into the 5 gallon bucket for easy transport. For the larger fish and catfish bring a clean trash can or large container with pond water in it.

DNR can answer your questions:

The Illinois Department of Natural Resources District Fisheries Biologists will be happy to assist you in developing a stocking strategy, as well as addressing other pond management questions which you may have. For information contact: Andy Blauck at 815-675-2386, ext.315.
